

# DECCA IMPIANTI

## RECIPROCATING FEEDERS "AC" SERIES

- Regular feeding even with materials ranging from smooth, moist and earthy
- Flow adjustment by changing the amplitude of the cart ride and the frequency of the movement
- Linings made of wear-resistant steel easily replaceable

TYPE	Useful width of the upper passage (mm)	Max. Capacity (mc/h)	Power of the electric motor (Kw)*
AC 45	450	30	1.1
AC 60	600	70	3

These models are standards that can be adapted and modified according to specific project requirements.

\* with servoventilation and speed control through inverter
